***Ordering Hints:**

Thermometer: A good science thermometer goes down on its own, unlike a medical thermometer, which must be shaken down. Some kitchen thermometers will work, but most do not go low enough. You will need a thermometer that will go down to 30° F or 0° C.

20 Mule Team Borax: A laundry booster found next to laundry detergents in grocery stores.

Polystyrene beads: Used for stuffing stuffed animals. Found in some craft stores in the sewing section. Grated Styrofoam is an excellent substitute.
